

CIF price fiber optic distribution cabinet with 2 cores

Article Overview

The CIF price for a 2-core fiber optic distribution cabinet typically ranges from \$50 to \$150 per unit, depending on material, configuration, and supplier, but exact pricing requires a direct quote.

Overview of 2-Core Fiber Optic Distribution Cabinets

A fiber optic distribution cabinet (FDC) is used to terminate, splice, and distribute optical fibers in FTTH, FTTB, or FTTX networks. A 2-core cabinet is designed for small-scale deployments, often for residential or small business connections. These cabinets provide:

- Protection for fiber splices and connectors against dust, moisture, and UV exposure
- Indoor or outdoor installation options, with IP65-rated enclosures for outdoor use
- Mounting flexibility, including wall-mounted, pole-mounted, or floor-standing configurations
- Material options, typically high-impact ABS+PC or steel/SMC for durability and weather resistance

Pricing Considerations

The CIF price includes the cost of the cabinet, shipping, and insurance to the destination port. Factors affecting the price include:...
