

Cable management device inside open cable tray

Overview

Ladder rack (also known as “ladder trays” or “cable ladders”) are one of the most common types of cable runway. As the name suggests, they're constructed of two side rails connected by rungs, creating an open structure for cable support and management. Explore the one-stop shop for innovative, fast, and dependable cable management systems including wire mesh tray, ladder cable tray, prefab assemblies, fasteners, and assemblies. In this guide, we explain what cable trays are, the main types available, how to choose the correct size and duty rating, and what to consider when designing a cable tray. The Steelcase Universal Cable Management Kit mounts beneath worksurfaces with a hinged design that flips down to provide easy access to cords and cables when needed. Beneath most desks in the modern workplace is a growing chaos of cords. From heavy power cable pathways on oil drilling platforms to data center cabling, explore the cable tray that's strong yet. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. Combining local manufacture and distribution with an extensive product range, these facilities ensure we.
