

Construction Site Shed Distribution Box

Article Overview

A construction site shed distribution box is a robust, weatherproof electrical unit designed to safely distribute power to multiple tools and equipment on temporary or outdoor construction sites.

Purpose and Applications

Construction site distribution boxes, also called temporary power boxes, spider boxes, or site distribution units, are essential for safely supplying electricity to multiple devices simultaneously on construction sites, workshops, outdoor events, and temporary installations . They prevent unsafe use of extension cords and reduce risks such as overload, poor grounding, and water ingress . These boxes are widely used in civil building sites, market areas, festivals, and other temporary setups .

Key Features

- **Voltage Options:** Available in 110V for reduced-voltage safety on construction sites and 240V for standard mains applications .
- **Number of Outlets:** Units range from 4-way for light-duty tasks to 6-way or more for larger projects .
- **Enclosure and Protection:** Typically housed in IP-rated, weatherproof enclosures to protect against dust, moisture, and impact. Many include thermal overload protection and circuit breakers .
- **Sockets:** Often feature CEE industrial sockets (red for three-phase, blue for single-phase) compliant with IEC 60309 standards .
- **Mobility and Mounting:** Can be wall-mounted, floor-standing, or installed on elevat...
