

Copper strips for plastic busbars

Overview

Flexible copper bars are mainly used for providing the power connections between busbars and the disconnection devices. - Makes the busbar highly flexible. - Better behaviour under short-circuit conditions. Our copper strips are extensively utilised in electrical systems, transformers, switchgear, busbars, connections, earthing systems, and. Electrical installations use copper busbars for distributing power from a supply point to a number of output circuits, resulting to numerous applications including switch-gear, transformers, circuit breakers, busbar trunking system, terminals, connections, earthing/lightning system and many others. For the lowest possible voltage drop, we use only highly conductive copper Cu-ETP & OF-Cu for your copper busbars. Overview of WELLGO Power Copper Strip For 18650 21700.
