

Dimensions and parameters of the integrated outdoor power supply cabinet for base stations

Article Overview

Outdoor integrated power supply cabinets for base stations are modular, weatherproof enclosures designed to house network equipment, batteries, and power systems, typically ranging from 30U to 40U in height with robust steel and sandwich panel construction.

Dimensions and Structure

- Height: Commonly 30U or 40U rack units, suitable for standard 19" equipment installation .
- Width and Depth: Typically designed to fit through standard corridors; cabinets exceeding 800 mm in width or depth can be disassembled for transport .
- Material: Constructed from sheet metal frames and sandwich panels, offering lightweight yet high-strength performance, corrosion resistance, and low thermal conductivity .
- Door and Panel Thickness: Front doors often 2.0 mm steel, roof 2.5 mm aluminum, other parts 1.5 mm steel . Door-mounted rubber seals ensure waterproofing and environmental protection .
- Locking Mechanism: Multi-point or two-level locks (Normal & Master) for security against unauthorized access .
