

Fiber Optic Cable Training

Overview

Suited to anyone working with optical fiber at any level, the online course covers fiber optic infrastructure transmission, construction, planning, installation, termination, inspection, testing and more. CommScope's Fiber Optic Training Courses provide a comprehensive understanding of fiber optic cabling. Purchase equipment to use with our material and supplies. A well-trained Fiber Optics Technician is in high demand in today's job market! Professional-level fiber optic training prepares technicians to maintain the fiber optic systems used throughout the telecommunications industry, which transmit both voice and data signals. Whether you are interested in. Register two students for any summer class scheduled from June–August 2026 and receive 10% off + FREE Fiber Foundations training and FREE certification. Cannot be combined with any other. This 3-day fiber optics course is designed for anyone interested in becoming a Certified Fiber Optics Technician. This program combines theory and 85% hands-on activities to prepare the student to take the CFOT (Certified Fiber Optics Technician) test that is sanctioned by the FOA (Fiber Optics Association). See the Light® Fiber Optic Training offers courses for all skill levels and schedules! Check our training calendar for current classes. A program that equips technicians and network specialists with skills needed to design, engineer, install, and manage a growing fiber broadband network across the.
