

Fiber Optic Cable Tray Accessories

Article Overview

Fiber optic cable tray systems use a variety of accessories to protect, route, and manage fiber cables efficiently.

Common Accessories and Their Functions

1. Connectors and Couplers

- Straight connectors: Join two straight sections of fiber cable trays to extend the pathway .
- Bend connectors: Allow the tray to change direction, including 90° bends, tees, and crosses for complex routing .
- Reducer joints: Connect trays of different sizes to maintain continuity in the fiber pathway .

2. Cable Exit and Entry Kits

- Trumpet outlets: Provide controlled exits for fiber cables, maintaining bend radius limits and protecting fibers from sharp edges .
- Movable cable exit kits: Enable flexible routing in data centers or installations requiring frequent changes .
- Pipe outlet plates: Facilitate fiber cable exit through conduits or pipes .

3. Protective and Identification Accessories

- End caps: Cover open ends of trays to prevent dust ingress and provide safety
