

Function of the transparent protective cover in front of the distribution box

Overview

Transparent protective covers for panels are specialized components designed to protect the electrical panel components from dust, moisture, and mechanical damage. Utility meter enclosures use clear covers to allow readings without exposing internal hardware to weather or tampering. Control panels on industrial equipment may be locked or sealed while energized. These covers allow a clear view of the panel's contents, reducing the need to open the cover during inspection, thus ensuring both. These IP67 transparent covers designed to fit a wide range of circuit breaker boxes, including 2, 4, 6, 8, 10, 12, 13, 16, 18, and 24-position configurations, with an 86 type option. These covers provide reliable protection from dust, water, and impacts without sacrificing visibility for. Polycase offers several electrical enclosures and boxes made from polycarbonate with a transparent clear cover for those applications that need visual access to internal components. Discover the convenience. SmartGuard manufactures and distributes clear plastic electrical panel covers for use by electricians.
