

Household electrical distribution box placed in

Article Overview

The household electrical distribution box is typically located in the basement, garage, utility room, or mounted outside near the electrical meter.

Typical Locations

The distribution box, also called an electrical panel or breaker box, is usually a rectangular gray metal box about the size of a medicine cabinet. Common locations include:

- Basement: Often near where the main power line enters the home .
- Garage: Mounted on a wall for easy access .
- Utility Room: Close to other home systems like water heaters or HVAC units .
- Outside: Near the electrical meter, especially in homes without basements .

Function and Components

The distribution box serves as the central hub for electricity in your home, controlling the flow to all circuits. Key components include:

- Main Breaker: Shuts off power to the entire house in emergencies or for maintenance .
- Circuit Breakers or Fuses: Protect individual circuits from overloads and short circuits ...
