

How much clearance should be left between the cable tray hanger and the tray slot

Overview

Clearances: Maintain at least 12 inches of vertical clearance above trays for installation and maintenance access (2026 NEC update). These systems, made from metal or plastic, are open structures designed to support electrical conductors, ensuring proper organization and safety. Similarly, the gap between upper and lower trays must also. Do you have any information available for recommended installation clearances for this type of cable tray?

Answer: The NEC does not have a specific installation clearance, but indicates in section 318-6 (b) that cable trays should be exposed and accessible. Telecommunications standard TIA/EIA-569. The primary rulebook used in the safe use of cable trays is NEC Article 392. Here are some general guidelines: 1. IEC 61537 specifies load testing methods to.
