

How much does fireproof cable tray cost in Grenada

Article Overview

Fireproof cable trays typically cost between \$20 and \$50 per meter, depending on material, fireproof coating, and installation complexity.

Price Overview

The cost of a fireproof cable tray depends on several factors:

- **Material:** Steel trays are common and cost between \$10–\$30 per meter, while aluminum trays range from \$20–\$50 per meter. Fiberglass or FRP trays, which are naturally fire-resistant, can also fall within the \$10–\$50 per meter range depending on specifications and environmental resistance .
- **Fireproofing:** Applying fire-resistant coatings or using fireproof tapes (like FLAMMOTECT-A or DG-CR 0.7) adds to the cost. These coatings enhance resistance to flame, UV, moisture, and chemicals, ensuring cables remain functional during a fire .
- **Tray Type:** Ladder-type trays are more expensive than perforated or wire mesh trays due to their higher load capacity and structural strength .
- **Installation:** Labor, supports, brackets, and connectors can significantly affect the total cost. Installation in complex or high-rise environments may increase expenses .
