

How much does galvanized cable tray cost in Argentina

Article Overview

The cost of galvanized cable trays in Argentina typically ranges from \$5 to \$25 USD per meter, with hot-dip galvanized trays costing 15–30% more than standard steel trays.

Price Overview

The price of galvanized cable trays depends on several factors including material, type, size, coating, and supplier margins. Standard steel trays generally cost \$5–\$25 USD per meter, while hot-dip galvanized trays, which offer superior corrosion resistance, can add 15–30% to the base steel price. Ladder-type trays, commonly used for heavy cable loads, are at the higher end of this range, whereas perforated or wire mesh trays are usually cheaper.

Local Market Considerations

In Argentina, pricing is influenced by raw material costs, particularly steel and aluminum, which fluctuate with global commodity markets. The exchange rate of the Argentine Peso against the US Dollar also significantly affects local prices, as many materials and imports are dollar-denominated. Domestic inflation and labor costs further contribute to variability, making it common for suppliers to adjust quotes frequently.
