

How much is the meter reading for a level 3 distribution box

Article Overview

The typical cost for a level 3 distribution box, including meter installation, ranges from \$1,200 to \$4,500 depending on amperage, location, and installation complexity.

Cost Overview

A level 3 distribution box generally refers to a mid-range or higher-capacity panel, often rated between 150–200A. For such installations:

- Residential mid-range upgrades (150–200A, standard outdoor panel with meter socket) typically cost \$2,800–\$4,500, including labor, materials, and permits .
- Basic indoor panels (100–125A) cost less, around \$1,200–\$2,000, while premium or complex installations can reach \$4,500–\$8,000 .
- Meter socket replacement adds \$200–\$600 to the total cost .

Factors Affecting Cost

- Amperage Rating: Higher amperage panels require larger enclosures, heavier conductors, and more robust breakers, increasing both material and labor costs .
- Location: Outdoor or weatherproof installations are more expensive due to durable enclosures and additional safety requirements .
- Labor Complexity: Rewiring, rerouting conduits, or upgrading service entrances can extend labor hours from 6–18 hours for standard jobs to 16–24 hours for complex setups .
- Permits and Inspections: Local code compliance, permits, and utility coordination...
