

How to access the backend of a TP-Link Layer 2 core switch

Overview

You can access and manage the switch using the GUI (Graphical User Interface, also called web interface in this text) or using the CLI (Command Line Interface). There are equivalent functions in the web interface and the command line interface, while web configuration is easier and more visual than. There are two methods to access the switch securely, that is via SSH and via HTTPS. SSH The SSH (Secure Shell) is a method for secure login from a terminal to a managed device. It is a secure alternative to. In this how-to, I will using the TP-Link T2600G-28TS L2 managed switch (affiliate link) and the TP-Link T1500G-10MPS PoE smart switch (affiliate link) to show the difference between the firmware versions. Page 1 TL-SL3428 JetStream L2 Managed Switch Rev: 1. is a registered trademark of TP-LINK TECHNOLOGIES CO. The switch uses two built-in web servers, HTTP server and HTTPS server, for user authentication.
