

How to calculate the price of fiber optic cables

Article Overview

The cost of fiber optic cables depends on cable type, length, installation method, labor, and additional components, typically ranging from \$0.05 to \$7 per foot or meter depending on specifications and installation complexity.

Step 1: Determine Cable Type and Fiber Count

Fiber optic cables vary by single-mode vs multimode, indoor vs outdoor, and armored vs non-armored. Single-mode cables are cheaper per foot but require more precise splicing equipment, while multimode OM4/OM5 cables cost 25% more than OM4 . The fiber strand count also affects cost: a 2-core cable is much cheaper than a 24-core or 96-core cable .

Step 2: Measure Cable Length

Calculate the total linear distance of the cable run, including slack for routing, bends, and future expansion. Costs are typically quoted per foot or per meter, with retail prices ranging from \$1 to \$6 per foot for materials, and wholesale bulk purchases as low as \$0.09 per foot .

Step 3: Choose Installation Method

Installation method significantly impacts cost:...
