

How to connect a coaxial fiber optic cable for cable TV

Overview

Attach the new fiber-optic cable to the existing coaxial cable by forming a hook on each cable, hooking the two together (like hooking one finger from your right hand to one finger from your left hand) and then folding the hook down onto itself and taping everything with. Attach the new fiber-optic cable to the existing coaxial cable by forming a hook on each cable, hooking the two together (like hooking one finger from your right hand to one finger from your left hand) and then folding the hook down onto itself and taping everything with. Locate the existing underground coaxial cable (and all other nearby underground utilities) with an underground cable locator. You must locate both ends of the existing coaxial cable and the complete route between both ends before you start digging. It is very important that you locate all other. The simple answer is no, you cannot directly connect fiber optic cables to coaxial cables. Verizon's FIOS service is one popular fiber.
