

How to connect all the connectors for the ceramic ferrule

Overview

This can be accomplished via mechanical crimp-on connections which don't use glue or splices but instead grip field fiber with mechanical crimping followed by finishing steps that create physical contact (PC) surfaces on their endfaces - effectively eliminating air gaps while. This can be accomplished via mechanical crimp-on connections which don't use glue or splices but instead grip field fiber with mechanical crimping followed by finishing steps that create physical contact (PC) surfaces on their endfaces - effectively eliminating air gaps while. This procedure describes the installation of the Corning heat-cure LC fiber optic connector with preradiused ceramic ferrule or preground angled ceramic ferrule. This installation requires the proper connector components, consumables, and equipment necessary for fiber installation into the. Thorlabs' 30127A3 FC/APC Connector has a 2.0 mm narrow key and an 8° pre-angled ceramic ferrule. The connector package includes a fiber connector cap and a Ø3 mm green boot. Additionally, we offer stainless steel sleeves designed for mating connectors to our stainless steel tubing.
