

Iranian optical module foreign companies

Article Overview

Iranian optical module companies operate across military, photonics, and ophthalmic sectors, with some historically sourcing technology from foreign companies despite sanctions.

Military and Defense-Linked Optical Companies

Isfahan Optics Industries (IOI), a subsidiary of Iran Electronics Industries under the Ministry of Defense, designs and manufactures advanced optical components and devices for military applications, including complex lenses, prisms, binoculars, periscopes, and collimators . IOI has produced aerial imaging cameras (Oghab series), thermal cameras (Fater series), and long-range monitoring systems (Sadad series) used by Iran's armed forces. Historically, IOI acquired foreign technology illicitly, such as the Maxicam 3002 high-speed camera from a U.S. company via intermediaries in Canada and the UAE, highlighting the role of foreign equipment in enhancing Iran's military optical capabilities .

Civilian Ophthalmic and Medical Optical Companies

Several Iranian companies focus on ophthalmic and optometric equipment, often importing from foreign suppliers:

- Fajre Shahed represents over 25 international companies from the USA, Europe, and the Far East, distributing ophthalmic instruments and sponsoring major ophthalmology congresses in Iran .
- Khane Negah Cheshm, established in 1996, distributes high-quality contact lenses...
