

Manufacturer s Optical Switch DML

Article Overview

The DML optical switch, model DML40-2-1111S01, is manufactured by SICK, a leading provider of industrial sensors and automation solutions.

Manufacturer Overview

SICK specializes in intelligent sensors and sensor solutions for industrial applications, offering products that enhance process control, safety, and environmental protection. They have extensive experience across multiple industries and provide system solutions tested and optimized in Europe, Asia, and North America .

Product Details

The DML series optical switch is part of SICK's range of intelligent sensors. While the datasheet for the DML40-2-1111S01 provides detailed specifications, key features typically include:

- High reliability and precision for industrial automation
 - Integration capability with control systems for process monitoring
 - Durable design suitable for harsh industrial environments
 - Customizable interfaces to meet specific application requirements
- These switches are used to control optical paths and manage light signals in industrial systems, ensuring accurate detection and switching without converting optical signals to electrical signals, which preserves speed and signal integrity .
