

Palau Fiber Optic Communication Equipment Manufacturer

Article Overview

Belau Submarine Cable Corporation manages Palau's submarine fiber optic network, while Quanzhou L-TEL Communication supplies digital fiber optic repeaters and related equipment.

Key Players in Palau

Belau Submarine Cable Corporation (BSCC) is a state-owned enterprise responsible for procuring, operating, and managing Palau's submarine fiber optic cables. Established in 2015, BSCC constructed a low-latency submarine cable linking Palau to the SEA-US network in 2017 and is currently building a second connection to the Echo submarine cable network. BSCC provides wholesale broadband services and manages all terminal station equipment, including high-capacity 100 Gbit/sec wavelength channels, ensuring reliable connectivity to the USA, Singapore, and Guam (Web results). Quanzhou L-TEL Communication supplies a range of digital fiber optic repeaters used in Palau for various communication systems, including 2G to 5G mobile networks, digital TV, FM radio, railway communications, and public security networks. Their repeaters use digital transmission technology to maintain signal quality over long distances, offering high dynamic range, anti-interference capabilities, and compliance with CPRI standards (Web result).

Additional Suppliers

For industrial optical modules, there are multiple suppliers listed in B2B marketplac...
