

Price of Custom-Made Electric Distribution Boxes

Article Overview

The cost of custom-made electrical distribution boxes varies widely, typically ranging from a few hundred to several thousand dollars depending on specifications, materials, and features.

Factors Affecting Price

- **Size and Capacity:** Larger boxes with higher amperage ratings and more circuits cost more due to increased material and assembly requirements .
- **Material Construction:** Options include carbon steel, stainless steel, or aluminum. Outdoor or weather-resistant enclosures generally carry a premium .
- **Customization Features:** Custom hole placements, interior paneling, racks, mounting options, and waterproofing increase costs .
- **Safety and Standards Compliance:** Boxes adhering to NEMA, IEC, or NEC standards, with proper IP ratings, grounding, and protective devices, may be more expensive .
- **Advanced Functionality:** Smart monitoring, remote control, touchscreen interfaces, and communication modules for industrial or data center applications significantly raise the price .
- **Quantity and Production Efficiency:** Bulk orders can reduce per-unit cost, while single custom units may be more expensive due to setup and design efforts .

Typical Price Ranges

- **Residential Units:** Basic single-phase boxes may start around \$200-\$500, while more complex three-phase systems can reach \$1,000 or more
