

Price of Distribution Box Fabrication and Installation Bracket

Article Overview

The cost of a distribution box with installation brackets typically ranges from \$50 to \$500 or more, depending on specifications, material, and customization.

Distribution Box Costs

The price of a distribution box varies widely based on voltage rating, amperage capacity, number of circuits, and material construction. Standard residential boxes for single-phase systems may start around \$50-\$100, while larger three-phase commercial or industrial units can exceed \$300-\$500 due to higher capacity and durability requirements. Outdoor or weather-resistant enclosures generally carry a premium compared to indoor-rated units. Advanced features like smart monitoring, digital displays, or energy management systems can further increase the cost.

Fabrication and Customization

Custom fabrication allows for specific mounting configurations, labeling, and integration with building management systems. Manufacturers often provide options for OEM branding, modular busbar fitment, and top cable entry modifications. Custom units may cost more upfront but ensure a perfect fit for your installation needs and reduce long-term maintenance issues.
