

Price of Simple Lighting Distribution Box

Article Overview

The typical price of a standard 4-way lighting distribution box ranges from \$30 to \$150, depending on brand, material, and features.

Price Overview

- Basic 4-way units like the Hager KLDS4 are generally priced around \$30-\$60 for residential or light commercial use. These boxes feature main terminals rated at 16A, socket outlets at 6A, and flexible conductor terminals at 10A, suitable for small lighting circuits .
- Industrial or heavy-duty boxes with metal enclosures, IP65 waterproof ratings, or multiple outlets (6-12) can cost \$100-\$150 or more, reflecting higher durability, corrosion resistance, and compliance with safety standards .
- Premium modular systems like flex7 boxes, which allow expansion and integration with centralized lighting control systems, may also fall in the \$120-\$200 range, depending on the number of outlets and additional accessories .

Factors Affecting Price

- Material: Steel or anodized aluminum enclosures are more expensive than plastic but offer better durability and protection against moisture and impact .
- Number of outlets: More outlets or expansion capability increases cost. Standard 4-way boxes are cheaper than 8-12 outlet units .
- Amperage rating: Higher-rated terminals for industrial applications can raise the price.
- Brand and certification: Well-known brands like Hager or flex7, which comply with IEC or NEC standards, typically cost more due to reliability and safety certification
