

Price of cable tray bend fixing bracket

Article Overview

Cable tray bending brackets typically cost around \$0.60 per unit, with prices varying based on material, size, and supplier.

Cable tray bending brackets are essential for routing and supporting cable trays in curves, slopes, or tees. On platforms like Alibaba, galvanized or stainless steel brackets are available for approximately \$0.60 per unit, with minimum orders starting at one piece, making them suitable for both wholesale and individual purchases . Suppliers such as McMaster-Carr and PLATT Electric offer a wide range of mounting and wall brackets for cable trays, including options for steel, pre-galvanized, or black-coated finishes. Prices can vary depending on size, load capacity, and corrosion resistance, with specialized brackets for heavy-duty or high-performance data cables costing more . Wall-mounted brackets, often hot-dip or sendzimir galvanized, provide high load capacity, durability, and compliance with standards like EN 61537, which may influence pricing for industrial or commercial installations . Bulk orders or OEM/ODM options from suppliers can also affect cost, with larger quantities typically reducing the per-unit price . When budgeting, consider the material type, bracket size, and intended load, as these factors directly impact both performance and price. For precise pricing, it is recommended to request quotes from multiple suppliers based on your project specifications.
