

Price of electrical distribution boxes on construction sites

Article Overview

Electrical distribution boxes for construction sites typically range from \$150 to over \$2,000 depending on capacity, features, and materials.

Typical Price Ranges

- Small, low-capacity boxes (30-60A): These are often used for temporary site cabins or light equipment and can cost around \$150-\$500 depending on features like waterproofing, built-in circuit breakers, and metering capabilities (Labérine Énergie, Sunnom) .
- Medium-capacity boxes (60-125A): Suitable for powering multiple tools, lighting, and small machinery, prices generally range from \$500-\$1,200. These often include multiple outlets, leakage protection, and pre-wired assemblies for easier installation (Amazon, DirectIndustry) .
- High-capacity or industrial boxes (160-400A): Designed for large construction sites with heavy machinery, these robust metal cabinets with advanced safety features can cost \$1,500-\$2,500 or more, especially if they include metering, modular expansion, or compliance with international standards like IEC 61439 (Labérine Énergie, DirectIndustry) .

Factors Affecting Cost

- Amperage and Load Capacity: Higher amperage boxes require larger components and more robust construction, increasing cost.
- Material and Durability: Steel enclosures are more expensive than plastic but offer...
