

Price of making a distribution box

Article Overview

The cost of making a distribution box ranges from as low as \$10 for basic residential units to over \$2,000 for high-capacity industrial or specialized units, depending on materials, size, and features.

Price Ranges by Type and Application

- Residential distribution boxes: Typically cost between \$10 and \$100 for standard plastic or metal enclosures suitable for single-phase or small three-phase systems .
- Commercial and industrial boxes: Prices range from \$200 to over \$2,000, reflecting higher durability, larger capacity, and advanced control systems .
- Septic system distribution boxes: Usually cost \$20 to \$150, depending on size and complexity .
- Portable or temporary boxes: Start at \$50 and can exceed \$500 for robust models used in events or construction sites .

Factors Affecting Cost

- Material: Plastic enclosures are cheaper but less durable, while steel or stainless steel boxes offer better protection and longevity, especially in outdoor or corrosive environments .
- Capacity and Size: Larger boxes with more circuits or higher amperage ratings cost more due to increased material and internal components .
- Internal Components: A box sold empty is cheaper; adding circuit breakers, surge protectors, busbars, and smart monitoring systems increases the price significantly .
- Installation and Labor: Professional installation is required for safety and code compliance, adding to the overall cost ...
