

Recommended AI Servers in Cambodia

Article Overview

For AI workloads in Cambodia, dedicated servers from VinaHost and TooServer offer high-performance, low-latency infrastructure suitable for local and regional AI applications.

Dedicated Server Options

VinaHost Cambodia provides dedicated servers optimized for the Asia-Pacific region, offering exclusive access to CPU, RAM, and storage, which ensures consistent performance for AI workloads. Users can choose Linux distributions (AlmaLinux, CentOS, Debian, Rocky Linux, Ubuntu) or Windows Server, with full administrative control for custom software installation, firewall configuration, and security management. RAM can be upgraded up to 128 GB, and storage options include HDD or SSD, making it suitable for AI model training and inference tasks. Pricing starts at approximately \$265.63/month, excluding VAT and Windows licenses (if applicable) . TooServer Phnom Penh offers bare-metal servers in a Tier 3 data center with native Cambodian IPs, 100% dedicated CPU and RAM, and 1Gbps bandwidth. Their Intel Xeon E5-2650v2 servers with 16GB RAM and 500GB SSD provide robust multi-threaded computing power for AI applications. Latency is extremely low locally (1-5ms in Phnom Penh) and remains competitive across Southeast Asia, making it ideal for AI services targeting Cambodia and neighboring countries. Monthly billing starts at \$400 with no long-term contract required .

Cloud and GPU Considerations

For GPU-intensive AI workloads, local hardware options are limited. Many developer...
