

Residential Lighting Distribution Box AL Dimensions

Article Overview

Standard residential lighting distribution boxes typically range from 200 × 200 × 120 mm to 400 × 300 × 150 mm, depending on the number of circuits and mounting type.

Standard Dimensions

Residential distribution boxes, also called breaker boxes or consumer units, are designed to house circuit breakers, bus bars, and wiring safely. Common wall-mounted sizes for single-phase residential applications include:

- Small single-phase boxes: approximately 200 × 200 × 120 mm (height × width × depth) for 4–6 circuits .
- Medium boxes: around 300 × 250 × 150 mm for 8–12 circuits .
- Larger boxes: up to 400 × 300 × 150 mm for 16–24 circuits, providing extra space for wiring and future expansion . The internal volume is critical to meet wire-fill requirements and ensure safe installation, especially when multiple lighting circuits are connected .

Mounting Types

- Flush-mounted: installed inside the wall, providing a clean finish; requires slightly larger wall cutouts to accommodate the box and cover .
- Surface-mounted: mounted on the wall surface, easier to access for maintenance,...
