

Sales of optical fiber communication pipes

Article Overview

Global sales of PE fiber optic cable sub-pipes reached approximately 150 million meters in 2024, with the market projected to grow steadily to over US\$ 60 million by 2032.

Market Overview

PE fiber optic cable sub-pipes, made from high-density polyethylene (HDPE), are essential for protecting optical fibers and ensuring stable signal transmission in telecommunications and data networks. In 2024, global sales reached 150 million meters, with an average price of USD 0.3 per meter, and an industry-average gross margin of 18%. The annual production capacity was roughly 200 million meters, indicating a healthy supply-demand balance. The cost structure of these pipes typically comprises 60% raw materials, 30% labor and manufacturing, and 10% other expenses such as transportation and management.

Regional Market Insights

- North America remains a significant market, driven by urban communication infrastructure and 5G deployment.
- Asia-Pacific is emerging as a fast-growing region due to rapid urbanization and increasing fiber optic adoption.
- Europe continues to expand steadily, with infrastructure upgrades and smart city projects contributing to demand
