

Setting up a router using PPPoE fiber optic cable

Article Overview

To set up a router for PPPoE fiber optic internet, access the router's admin panel, select PPPoE as the WAN connection type, and enter your ISP-provided username and password.

Step-by-Step Setup

- **Gather ISP Information** Before starting, ensure you have your PPPoE username and password from your internet service provider. Some ISPs may also provide a service name or require a VLAN ID, though most do not .
- **Connect Your Router**
 - Plug the fiber optic modem or ONT (Optical Network Terminal) into the router's WAN port using an Ethernet cable.
 - Power on both devices.
- **Access the Router Admin Panel**
 - Open a web browser and enter the router's IP address (commonly 192.168.1.1 or 192.168.0.1).
 - Log in using the default admin credentials (usually printed on the router or in the manual).
- **Select PPPoE as the Connection Type**
 - Navigate to WAN or Internet Settings.
 - Choose PPPoE as the connection type
