

South Korean network cable

Article Overview

South Korea is a global leader in high-speed internet and submarine cable infrastructure, supported by advanced domestic cable manufacturing and strategic international connections.

Submarine and International Cables

South Korea serves as a major hub for submarine telecommunications cables, connecting Asia, Europe, and the United States. Key landing stations are located in Busan, Keoje, and Taean, with Busan acting as the primary gateway . Major South Korean telecom operators involved in submarine cables include KT, SK Broadband, LG U Plus, and Sejong Telecom. KT participates in international systems such as TPE, NCP, SMW3, APG, APCN-2, while SK Broadband invests in SJC2, and Sejong Telecom co-owns C2C cable . The Trans-Pacific Express (TPE) cable, linking South Korea with China, Taiwan, Japan, and the U.S., has a design capacity of up to 5.12 Tbit/s, significantly enhancing trans-Pacific connectivity .

Domestic Cable Manufacturing

South Korea has a robust domestic cable industry. Taihan Cable & Solution is a leading manufacturer, recently acquiring a 2016-built cable laying vessel to strengthen offshore and long-distance cable installation capabilities, including HVDC transmission networks . Other notable manufacturers include Taihan Fiberoptics Co., Ltd., recognized as Korea's top fiber optic cable producer, and MRC Inc., which produces optical fibers, ADSS, OPGW, and FTTH network cables . These companies support both domestic infrastructure and international projects....
