

The elevator machine room can house the electrical distribution box

Overview

Power Distribution and Regulation: The machine room houses electrical components responsible for regulating and distributing power to different parts of the elevator system, ensuring proper functioning. This room is the heart of your elevator's operation, ensuring every trip is smooth and safe. Here's a detailed breakdown: --- □□

Purpose of Elevator Machine Room (EMR): * Houses the motor, drive system, controller, brake, and sometimes hoist rope. Each car, machine room and hoistway pit must have separate dedicated branch circuits for lighting, receptacles and HVAC, with car and machine-room lighting exempt from GFCI while required for receptacles. It defines hoistway, machine-room, remote machine-room and control-space terms, limits most supply voltages to 300 V.
