

The fiber optic light on the telecom router is flashing red

Overview

Orange, amber, or red lights usually indicate a problem ranging from a firmware update in progress to a lost internet connection. Most of these issues can be resolved with a simple power cycle (unplug for 30 seconds, plug back in). When it's green and steady, everything is fine. Normally, each light reflects a specific function: Power Light: Informed if the router is powered on. Wi-Fi Light: Shows the status and. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power cable. Depending on the brand of router, the red light can mean a few different things, but for the most part, it indicates an issue connecting to the internet.
