

Warranty micro-module IP65

Article Overview

IP65-rated solar micro-modules typically come with warranties ranging from 10 to 25 years, covering defects in materials, workmanship, and sometimes performance under normal operating conditions.

Warranty Duration and Coverage

IP65 micro-modules, such as the Marsrock 1200W and Enphase IQ7X, are designed for outdoor use with protection against dust and water jets. The Marsrock 1200W microinverter features IP65 waterproofing and a durable aluminum alloy housing, ensuring resistance to rain, corrosion, and heat, which supports long-term reliability . Warranties for these devices generally cover material and workmanship defects, meaning the manufacturer will repair or replace units that fail under normal installation and operating conditions.

- Enphase IQ7X: Offers a 25-year warranty, including wet-location approval, ensuring dependable performance for rooftop installations .
- Marsrock 1200W: While specific warranty duration may vary by supplier, IP65-rated microinverters typically have 10-25 years of coverage, depending on the manufacturer and model .

Performance Guarantees

Some micro-modules also include performance warranties, guaranteeing a minimum efficiency or output over time. For example, Enphase microinverters maintain 97.5% CEC efficiency, and the warranty ensures that the inverter continues to operate effi...
