

Waterproof quantitative distribution box

Article Overview

A waterproof quantitative distribution box is an IP65/IP66-rated enclosure designed to protect electrical components from water, dust, and environmental hazards, available in multiple sizes and configurations for industrial, commercial, and photovoltaic applications.

Key Features

- **Ingress Protection:** Most boxes are rated IP65 or IP66, ensuring protection against dust and water jets, suitable for outdoor and harsh environments .
- **Material:** Constructed from PC (polycarbonate) or ABS plastics, offering high impact resistance, UV stability, and flame-retardant properties .
- **Configurations:** Available in single, double, or triple layers, with multiple ways (4-39 ways) to accommodate different circuit layouts .
- **Internal Components:** Some models include pre-integrated copper terminals for reliable wiring and easy installation .
- **Customization:** Options for size, color, knockouts, flame retardancy, UV protection, and corrosion resistance are available to meet specific project requirements .
- **Standards Compliance:** Designed to meet IEC 60529, IEC 62262, IEC 60695-2-10, and often CE, RoHS, or TUV certifications .

Applications

- **Industrial and Commercial Facilities:** Protects electrical circuits, lighting, and machinery from environmental exposure .
- **Photovoltaic Systems:** Ideal for solar panel combiner boxes and string protection
