

What brands of PDUs are used in data center server racks

Overview

PDU suppliers in the data center sector deploy varied strategies, with Schneider Electric prioritizing innovation, Legrand leveraging specialized designs, and ABB emphasizing intelligent features. A power distribution unit (PDUs) is a device for controlling electrical power within a data centre. Our analysts note that these providers compete through advances in energy management, custom solutions. These power distribution units for server racks provide scalable options for high-density environments, optimizing energy usage while delivering reliability and sustainability to meet the needs of modern servers. Pick a PDU that fits your server's power needs. Make sure it can handle more power in. Eaton's rackmount PDU offering provides you with the power density and flexibility you require regardless of whether you're looking for PDUs for server racks or switching environments. Enconnex offers a full product line of basic, metered, switched, and universal PDUs. Reliable & Cost-Effective PDUs.
