

What to do if the cause of the problem cannot be found in the distribution box

Overview

Possible cause: Distribution Manager does not have sufficient rights to the computer. Effective troubleshooting requires knowing which reports to check and which client-side logs provide actionable insights. This guide consolidates the most important steps, log. This article discusses how to troubleshoot common content distribution issues. Original product version: Configuration Manager current branch, Microsoft System Center 2012 Configuration Manager, Microsoft System Center 2012 R2 Configuration Manager For this example, let's say that you distributed a. First, we are deploying a package and program, so we need to look at the `execmgr. log` that the content for this program is not available on the distribution point. I've re-distributed the package. When I try to add New Distribution point via console and go to `MonitoringOverviewDistribution StatusDistribution Point Configuration Status` - get 3 errors and all 3 say the same thing: Distribution Manager failed to install ditribution point `['Display=NEWDPFQDN']"MSWNET:.`
