

Which type of intelligent fiber optic tubing is more reliable

Overview

OS2 is the fiber optic cable type that provides the best performance over longer distances, and they're more durable to boot. K-Tube designs and manufactures fiber-filled metal tubing that delivers reliable protection in. In high-speed network environments—such as data centers, enterprise LANs, and telecom backbones—fiber optic cables are critical in delivering reliable, high-bandwidth connectivity. Multimode OM3/4/5), construction (Loose Tube vs. Tight Buffered), and application environment (Indoor/LSZH, Outdoor/ADSS, or Armored). Whether your project involves short patch links or long-haul backbone. There are many reasons why fiber optic cables play an essential role in many of today's networks and infrastructure: They offer long-distance capabilities, fast speeds, excellent reliability and futureproof performance to support the next generation of technology.
