

Wired Router with Pigtail

Article Overview

For wired routers that support pigtail connections, look for models with SFP ports or fiber-ready interfaces, such as the MikroTik hEX S or Ubiquiti EdgeRouter X SFP.

Understanding Pigtail Connections

A pigtail is a short fiber optic cable used to connect a fiber line to a device, typically terminating in an SFP (Small Form-factor Pluggable) module. If you want a wired router to work with fiber, the router must have an SFP port or support a compatible SFP module to accept the pigtail connection.

Recommended Wired Routers with SFP/Pigtail Support

- MikroTik hEX S (RB760iGS): Features 5 Gigabit Ethernet ports, a 1.25 Gbps SFP port, and PoE support. Ideal for home or small office setups requiring fiber connectivity. It supports link aggregation and advanced RouterOS features for flexible network management .
- Ubiquiti EdgeRouter X SFP: Includes 5 RJ45 ports and 1 SFP port, allowing fiber pigtail connections. It offers ACL-based firewall, NAT, and zone-based security, suitable for small business or advanced home networks .
- TP-Link ER7206: Multi-WAN professional wired router with 1 Gigabit SFP WAN port and 2 changeable WAN/LAN ports. Supports VPN, SPI firewall, and load balancing, making it suitable for fiber backhaul setups .
- Cisco ISR 891F or C1111X-8P: Enterprise-grade routers with multiple RJ45 and SFP ports, supporting fiber pigtails for high-speed WAN connections
